TX Text Control® .NET Windows Forms in action: WYSIWYG for your applications

PROFESSIONAL WORD PROCESSING FOR YOUR APPLICATIONS

The ability to create and edit text or documents is critical to all organizations. TX Text Control® offers you a unique family of components to directly integrate professional text and document processing into your own applications.

TX Text Control® is the 'all-in-one' family of word processing components and a Microsoft® Visual Studio Industry Partner. It offers a number of tools to create, edit and convert documents in Windows Forms, WPF and ASP.NET applications.

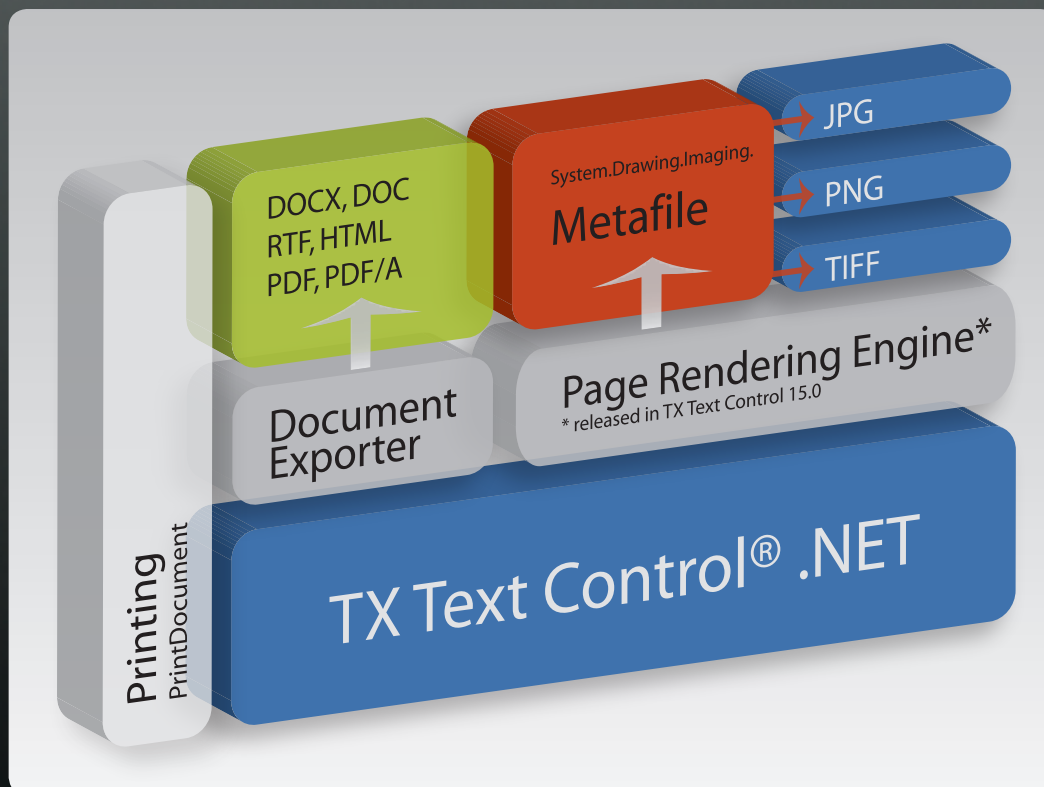

- Office Open XML (DOCX)
- Adobe® PDF
- Adobe® PDF/A
- MS Word DOC
- Rich Text Format
- HTML

Thanks to TX Text Control's exceptional WYSIWYG rendering technologies, documents displayed on screen look exactly as the hard copies from the printer. TX Text Control® supports the most important document formatting standards including:

TX Text Control® implements user friendly toolbars and ruler controls, which radically reduce the time it takes to create full-fledged word processing applications. Control all customary text editing elements including headers and footers, margins, text boxes, nested tables, and images either programmatically or through direct interaction.

CREATE ADOBE® PDF DOCUMENTS

Adobe® PDF format has become the de facto standard for the exchange of documents and is integrated into many business processes. TX Text Control® allows you to import and export business critical documents to and from PDF and PDF/A.

TX Text Control® offers comprehensive import, export, and print capabilities.

AUTOMATE YOUR DOCUMENTS

The requirements of word processing applications are continually changing. A current trend sees the migration to centralized solutions. TX Text Control® helps you automate your word processing applications.

With TX Text Control®, you can automatically create, convert, store, and print documents server-side. Additionally, use Microsoft® Word templates to create and archive print-ready PDF documents from multiple databases.

The integration of database contents with Microsoft® Word templates allows for the creation and archival of print-ready PDF documents – all without Microsoft Office®!

Easily integrate TX Text Control® server-side components into your ASP.NET web applications, SharePoint® applications, Windows services, and web services.

EDIT DOCUMENTS DIRECTLY IN YOUR BROWSER

In addition to the server-side components, TX Text Control® offers a full range of client-side components to create and edit documents directly in the browser. The true WYSIWYG display of documents allows layout elements to be recreated and modified, including headers and footers, page sizes and layouts.

TX Text Control® offers a comprehensive API for document creation, modification and archival. Regardless of interface, the developed code from Windows Forms, ASP.NET, WebForms or in a web service is compatible and can be redeployed across platforms. This saves you time and guarantees forward compatibility.

SUPPORT: ALWAYS THERE FOR YOU

What really separates TX Text Control® from its competitors is the unsurpassed customer service and technical support we provide for the lifetime of your license.

Both licensed customers and free trial users have complete access to all of our client support services.

We guarantee you both fast and efficient support through our highly skilled support representatives and expert product developers.

Not only will we provide support regarding technical and implementation issues, but we will also work to provide assistance with architectural application design and proof of concept studies.

TX TEXT CONTROL® REFERENCES

"No other tested supplier's solution for a word processing solution reached a comparable level of stability and formatting options."
 Hans-Jürgen Hohmeier, Audit Manager , DATEV e.G.

"TX Text Control Server helped us to convert HTML to MS Word in a very stable intranet solution."
 Peter Kuhne, Business Management, Deutsche Bank AG

"The deciding factor in deployment of TX Text Control was the precise rendering of RTF documents. Other supplier's solution were not exact enough." Sascha Wenzlik, developer, Siemens

"We have appreciated the programmability and ease of use afforded to us by using TX Text Control."
 Brian K. Chamberlain, developer , US Air Force

ABOUT TX TEXT CONTROL®

TX Text Control® was first released in 1991. Since then, our components have been licensed and sold to more than 40,000 developers.
